CCRINFO.ORG

Do you think your infant or toddler isn't learning, growing, or speaking as quickly as other same age children? We can coordinate a developmental evaluation for your child who is birth to three years of age.

If your child is eligible, our Service Coordinators can link you to supports and services at no cost to you. They can be provided in your home or anywhere your child normally goes.

Service Coordinators also make referrals to community and social service agencies such as childcare centers, Head Start programs, free community events, and for continued services after the age of three.

Service options may include:

- Special Instruction
- Physical Therapy
- Occupational Therapy
- Speech Therapy
- Nutrition Services
- Vision and Hearing Services
